

Primary school „Nikolaj Velimirovic“ Sabac

„Bicycle Day“ – Report

As a part of the planned project activities, the “Bicycle Day” event was held at “Nikolaj Velimirović” Primary School in Šabac.

We will involve 20 schoolchildren and 2 teachers from the local school of Stana Milanovic

At the beginning of the event, the project coordinator presented the outcomes of our activities from the previous year. The students, who were also involved in various measurements, had the opportunity to review the scope of their participation and to observe the final products generated through those project activities.

Physical education teachers delivered a lecture focusing on the health-related aspects of cycling, while technology and engineering teachers held a presentation on traffic safety and proper bicycle handling in an urban environment.

Following the presentations, the participants moved to a designated practice area where they applied the acquired knowledge through practical exercises.

The primary objective of the event was to educate students on the advantages of using bicycles as a mode of transportation. Special attention was given to the following benefits:

- Safe cycling in an urban environment
- A healthy lifestyle
- Improved physical motor skills
- Increased vital capacity
- Weight management
- Reduction of air pollution
- Environmental protection
- Social interaction
